

“To have a Newton Fellowship is one of the most exciting experiences of my career. Its comprehensive support provides the best possible conditions to join different aspects of everyday leading-edge science while learning, discussing and creating.”

Dr Florencia Barrios,
went from the University
of Rome to the University
of Cambridge

Newton International Fellowships provide an opportunity for the best **early-stage postdoctoral researchers worldwide** to work at a UK institution for two years.

The scheme is run as a partnership between the Royal Society and the British Academy and awards can be made to researchers in the physical sciences, natural sciences, social sciences and the humanities.

Newton International Fellows receive £24,000 per annum subsistence funding, up to £8,000 per annum research costs and up to £2,000 relocation expenses. Additional funding is also available to alumni to continue collaborations with the UK.

Applications open on a yearly basis, with around 40 Fellowships awarded each year. Applicants must be in contact with their proposed host at a UK institution prior to applying.
