

“The Newton International Fellowships is rare and unique in terms of duration, opportunities and reach. It is one of the best things to have happened in my career and the follow-on funding scheme is well structured to further enhance career development.”

Dr David Ogbolu went from Ladoke Akintola University of Technology, Nigeria to the University of Birmingham

Newton International Fellowships provide an opportunity for the best **early-stage postdoctoral researchers worldwide** to work at a UK institution for two years.

The scheme is run as a partnership between the Royal Society and the British Academy and awards can be made to researchers in the physical sciences, natural sciences, social sciences and the humanities.

Newton International Fellows receive £24,000 per annum subsistence funding, up to £8,000 per annum research costs and up to £2,000 relocation expenses. Additional funding is also available to alumni to continue collaborations with the UK.

Applications open on a yearly basis, with around 40 Fellowships awarded each year. Applicants must be in contact with their proposed host at a UK institution prior to applying.
