

STUDENT HOUSING

The College of Biological & Physical Sciences provides different types of accommodation for undergraduate and postgraduate students, on and off campus.

Each residence has its own history and traditions, but they all try to provide a great experience. Safety is of great importance to CBPS, so all residences have strict access control and most are covered by closed-circuit television cameras.

Students with disabilities can be accommodated in different residences. Simply contact the Student Accommodation Office and the Disability Service, and they will address your particular needs.

You can apply for accommodation through the [online room application system](#). Queries pertaining to online room application process can be addressed to hamis@uonbi.ac.ke or through telephone numbers 0204913433 or 0204913405.
